

DURALACTIN[®]

E Q U I N E

PELLETS

For Long Term Management of
Chronic Inflammatory Conditions in Horses
Now Available in a Preferred Pellet Form

Duralactin[®] Equine Pellets

Palatable pelleted formulation containing

- MicroLactin[®], a patented dried milk protein from the milk of hyperimmunized cows, contains factors that appear to block cytokines to inhibit neutrophil participation in the inflammatory response.
- Zinc to help maintain structural integrity of cell membranes.
- Manganese as a co-factor in joint fluid synthesis to help support normal activity.

1 BUCKET
treats a horse for
56 DAYS!

Evidence-Based Study

Clinical Experience Using MicroLactin® for the Treatment of Equine Inflammatory Conditions

Thomas R. Bello, DVM, PhD and Tammy M. Allen, RVT
Journal of Equine Veterinary Science, Vol 29, No 6 (2009)

Summary

MicroLactin® was given in two trials to 166 horses in which neutrophils were associated with an inflammatory response. The primary clinical groups having the greatest positive responders to the use of MicroLactin® were respiratory conditions (92%), lameness/foot trauma (90%), muscle injury (92%), skin trauma (89%) and gastrointestinal inflammation (89%).

Duralactin® Equine Pellets

Active ingredients per level scoop (1/2 ounce)

MicroLactin® (dried milk protein).....	7000 mg
Zinc.....	15 mg
Manganese.....	8 mg

Dose

Give 2 level scoops once a day or 1 level scoop twice a day on sweet feed. Each level scoop holds approximately 15g total weight. One bucket contains a minimum of 112 level scoops.

#100504142 Net weight 3.75 lbs (1,701 g), 6 buckets per case

- 100% acceptance
- Give on sweet feed
- One bucket treats one horse for 56 days

Supports joint health and function

Duralactin® Equine Joint Plus pellets

Active ingredients per level scoop (1oz)

MicroLactin® (dried milk protein).....	7000 mg
Glucosamine HCl (marine source).....	900 mg
Chondroitin sulfate (marine source).....	300 mg
Vitamin C (ascorbic acid).....	50 mg
Zinc.....	15 mg
