Harmonease® Chewable Tablets - Studies*

Stereotypical Behavior Study

- Kennel dogs with one or more stereotypical behaviors
 - Lick granuloma
 - Spinning
 - Cowering
- Seven out of ten dogs stopped stereotypical behaviors within 6 days of administration

Noise Phobia Study

- Laboratory model of noise induced stress
- Randomized, blinded, placebo-controlled crossover design
- Treated for 7 days prior to assessment
- Harmonease® Chewable Tablets proved effective compared to placebo (60% vs. 25%) in improving response to noise related stress

Safety Study

- Thirty-two dogs (8 dogs per group) randomly assigned 0x, 1x, 3x or 5x the label dose for 28 days
- Some dogs experienced mild and self limiting vomiting and diarrhea, mostly in the 5x group

Palatability Study

- Acceptance test with 20 dogs in 2 day trial
- All dogs ate offered tablets
