### Vet•Kem® Products Flea Clinic Kit

You're not the only family living in the house... **Meet the Fleagles!**

This little flea family is more than happy to take a short ride into the family's house on the family pet and settle into carpets, pet bedding or a favorite chair.

In an effort to help raise awareness of the benefits of complete flea control, we are offering a Vet•Kem® Products Flea Clinic Kit to the veterinary clinic. The kit contains all the tools necessary to help you market the Vet•Kem® products to your clients. Each kit contains the following:

- 1 Fleagles Counter Mat
- 1 Fleagles Wall/Window Cling
- 1 Fleagles 2-sided Poster
- 25 Fleagles Informational Booklets
- 1 Vet•Kem® Products Sales Brochure

*Winning the Battle* over fleas and ticks takes more than just controlling the adults you see on the animal. It requires a complete program that will control all stages of the life cycle. Products that only contain an adulticide will kill the mature fleas, but may not have effect on the flea eggs, larvae and pupae that do not reside on the animal.

Ticks are harder to kill and take longer to die than fleas. Tick populations usually surge in the early spring, well ahead of the peak flea season, which usually occurs in the late summer. Ticks may take 1-3 years to complete their life cycle. On-animal products do not prevent ticks from crawling onto pets, but once there, they die more quickly with the use of a "wet" product such as a shampoo or spray. The entire house must be treated, concentrating on dark hiding places. Use a combination of foggers and hand-held sprays. The yard must be treated often, especially during the first two months of spring tick season. Since ticks like dark moist places, keeping the lawn clear, grass mowed and foliage trimmed will limit the tick population.

An integrated flea and tick control strategy must include the use of a combination of products and the use of an IGR, such as (S)-Methoprene, to control pests on the animal, in the house and outdoors.

**VET·KEM** products offer an entire line to complement your current flea & tick control program...
